

LANGUAGE AND LITERACY PROJECT

LITERACY IN MY COUNTRY

The main issue of literacy is that it is associated with human intellect (House, 2021). For instance, in my country people who speak native languages were often discriminated. Furthermore, people who don't know how to read and write cannot participate in the society. For those reasons, reading and writing are crucial for education.

EARLY READING EXPERIENCE

In this context, my mother made me read a lot as a child, even complex books that I didn't understand. At the time, I felt like an obligation rather than a hobby. So, I decided to avoid reading most of the times, preferring learning by watching videos.

HOW THIS EXPERIENCE AFFECTED ME?

In primary school I was struggling with the literature and communication course because it was pretty boring for me. Therefore, I had to change my learning style with visual learning and active annotations to be able to pass the class.

READING FOR ME NOW

Even though I am a visual learner, I get used to read a lot because it is the only way to extract valuable information of complex topics.

ACTIVE LEARNING

CONCLUSION

Reading is a path of knowledge, complex readings like articles or thesis are required to be learned with other techniques such as active reading, scaffold reading and others.
